# Instant Empowerment

Qlik® Education

Qlik Q

Qlik Education

When you and everyone else in your organization is ready to get faster answers, more insights, and better outcomes with data integration and analytics, we empower you with the best ways to learn how to use our Qlik products to understand, or gain insights from your data.

Qlik Education courseware, tools, and programs showcase the many capabilities of our Qlik products while helping you discover how to use them to perform better at work. We organize our learning paths and best practices on roles, without requiring you to memorize and repeat features or functions. We make sure you stay current with our new Qlik capabilities. We provide a variety of training formats – Private or Public classroom, live or virtual, and in self-paced online learning environments. And we offer a unique data literacy program that empowers everyone to understand, analyze and use data with confidence.

It's not about what you know; it's about what you can do

Technology is only an advantage to your organization if your users know what to do with it. That's why our Qlik Education instructors go beyond teaching facts to showing all of your employees how to use our products to do their jobs more effectively.

We boost on-the-job success with a powerful training program that delivers benefits every day:

Drive your data and analytics expertise

- Take advantage of role-based technical training that relates directly to specific jobs

- Benefit from a curriculum that is updated with every product release

- Accelerate your adoption of data literacy and analytics best practices

Support learning when your users need it most

- Provide access to a comprehensive library of online modules anytime in our Qlik Continuous Classroom

- Get answers fast with our Continuous Classroom's powerful, smart search

- Access our Continuous Classroom instructors in a live webinar or 1:1 with more specific questions

Boost your business user adoption

- Give your app consumers access to a free library of online modules

- Work with us to customize training for your specific apps

- Enjoy tailored learning sessions to maximize adoption

"My team and I went from not knowing much about the product to both being able to assess a request and all the possible ways to get a solution in place."
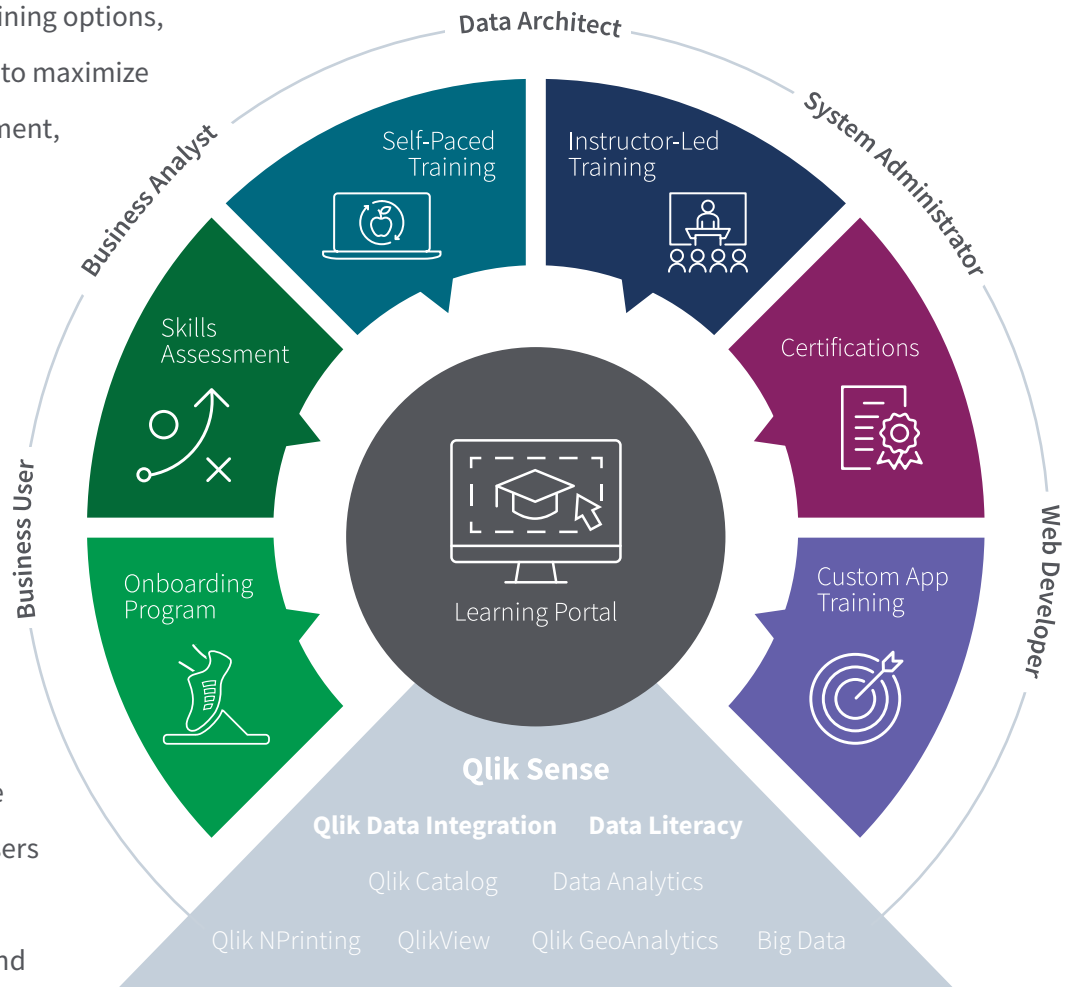

Eduardo A., IT Architect, Joie

Our Unique Approach

Our goal is always to empower you and your users to work independently and be self-sufficient to do their jobs. We work hard to achieve this goal by applying a unique methodology to all of our offerings. Our courses aren't just implementation training or scripted courses. Rather, we use a learning model that maximizes the transfer of job-related skills and knowledge.

And our learning content covers more than the capabilities of Qlik's products. We also focus on Data Literacy – the ability to read, write, analyze, and argue with data – which is a complementary skillset you and your colleagues need to do your jobs successfully.

Qlik Learning Portal

Our Qlik Learning Portal is your one-stop shop for all of your learning needs. Take our pre-training assessments and post-training qualifications and certifications. Access our self-paced online courses inside the Qlik Continuous Classroom. Register for instructor-led classes, and find all the supporting training materials for the class you are attending. Stay current with access to the very latest resources. Visit learning.qlik.com.

The Value of Training

There's really no substitute for formal training when it comes to teaching your business users about new software.

Although platforms like Google and YouTube provide videos and advice to answer specific user's questions, there are some major drawbacks to these choices:

- They're not scalable for sharing new skills with every role across your business.

- Their static posts and videos restrict engagement.

- If your users don't understand something, there's no path to discover more.

- And they only answer the questions your users ask, about capabilities they already know.

Qlik Q

About Qlik

Qlik's vision is a data-literate world, where everyone can use data and analytics to improve decision-making and solve their most challenging problems. Qlik offers real-time data integration and analytics solutions, powered by Qlik Cloud, to close the gaps between data, insights and action. By transforming data into Active Intelligence, businesses can drive better decisions, improve revenue and profitability, and optimize customer relationships. Qlik serves more than 38,000 active customers in over 100 countries.
